Meeting Agenda
Location:Lecture hall Johannesberg
Date: 30-03-2012
Time: 13.15
Facilitator: *Fanny Malmek*
Participants: Sebastian d'Aubigné, Simon Nilsson, Fanny Malmek
Objectives:
Discuss:
- workshops
- code comments
- graphics : slick

Reports

There has been progress in testing as well as discussing how the view are going to cooperate with the rest of the model and controllers.

The group has installed a software that makes code coverage available after testing which has made the work of finding bugs significantly easier.

A "todo"-list has been created and it holds the things that needs to be done for the project's progress.

It was also decided on a time limit for communicating within the group to relieve the stress during nights etc.

Discussion items/outcomes

The third workshop was skipped. More code implementation and helping the 4th member of the project to get into the work due to the member's absence. Therefore it was discussed and decided on that it would be helpful to do it despite the fact that the project isn't going to have aspects of such things that the workshop exercise would. There was also instructions about to comment the project's classes for better understandability. It was discussed how much commenting that were actually needed; and a decision were made to make small comments, defining methods and classes in the project. Last but not least an agreement was made on having some sort of idea of any graphics for the application.

Assignments

We have the "Todo"-list. From that one can pick an assignment by choice.

The main focus during the vacation will be finding graphics and developing ideas around them.
